Parking and Transportation Impacts Related to Construction of
Academic VII Building (Future Home of College of Health and Human Services)

Beginning the week of July 6th, construction on the Academic VII Building, the future home of the College of Health and Human Services will begin. **Parking Lot H is scheduled to close on Wednesday, July 8th.** Information on alternative parking options can be found at: [http://parking.gmu.edu/pdfrule2015/LotHclosureinfo1webposting061915.pdf](http://parking.gmu.edu/pdfrule2015/LotHclosureinfo1webposting061915.pdf)

Along with the closure of Lot H will come multiple phases of road closures and detours on the northwest part of the Fairfax Campus as Patriot Circle is rebuilt to the south of its current location between George Mason Boulevard and Aquia Creek Lane. As part of the road work, Occoquan River Lane will be realigned and George Mason Boulevard will be widened. Access to Lot I will be changed as part of the construction and may be limited at times.

Other impacts include the closure of the small reserved/administrative parking lot, motorcycle parking and disabled parking by Finley Building and Thompson Hall. The regular metered visitor parking spaces by Finley will be converted to disabled spaces for permit holders and visitors. During a later phase, this parking lot will be closed and rebuilt.

The Chesapeake River Lane shuttle stop across from Merten Hall may be closed or relocated at times during construction.

From early July to the middle of August, Patriot Circle between George Mason Boulevard and Aquia Creek Lane will be closed. This will be reopened for the start of the semester but will close again on or about September 15th. It will stay closed for the remainder of the roadwork.

After August, there will be several more phases of road closures and detours. Pedestrian paths will also be detoured throughout the road construction which will last into the spring semester.

Periodic updates will be sent to the campus community throughout the year. Information will be regularly posted at building.gmu.edu.
